

LITHUANIAN DEFENCE INDUSTRY:

map of products and services

AIR/SPACE

NANOAVIONIKA
Satellite communication, flight-proven nano-satellite

AIR/UAV

AERODIAGNOSTIKA (THRUST)
UAV systems for monitoring and military applications (target, reconnaissance)

GRANTA SOLUTIONS
Fixed wing micro-UAV for surveillance and reconnaissance purposes

MINISKIPAS
UAVs for visual information collection and post-processing

AIR/GROUND SUPPORT

ASU BALTIJA
Aircraft repair, maintenance and modernization

AVIATIC MRO
Aircraft and helicopter maintenance, training of pilots

AMMUNITION

GIRAITĖS GINKLUOTĖS GAMYKLA
NATO ball cartridges

COMMUNICATION AND INFORMATION SYSTEMS

NRD CS
Cyber security (hardware and software)

PRIMECOM
Cellular network security solutions

PIXPRO
Photogrammetric image reconstruction solutions

ELSYS TS
ICT design, development, installation, maintenance

ELSYS PRO
Software development, system integration (ICT, C4I, radar systems)

IMINT
AI automatic image recognition solution for military vehicles

COMPONENTS

ALTECHNA
Optical components, OEM

ALTECHNA R&D
Laser workstations, cutting glass & sapphire technology, optics

EKSMA OPTICS
Optical components, laser optics, IBS coating, nonlinear crystals, assembling of electro-optical systems

INTEGRATED OPTICS
Lasers for sensing applications, quantum cryptography, micro-optics assembly and prototyping

OPTOMAN
Durable laser optics for extreme power applications

3 FOTONAI
Laser optics and crystals

PRECIZIKA METROLOGY
Mechatronics components (encoders)

STEVILA
Mechanical high-precision components

SARGASAS
Opto-mechanical components

ESEMDA
Electronic components: serial electronics production & prototyping

KITRON
Electronic equipment and components

ENERGUS POWER SOLUTIONS
Power supply: lightweight, high density energy storage

DETECTION, LOCATION, ACQUISITION AND DECEPTION

BROLIS SEMICONDUCTORS
Semiconductor opto-electronic devices: laser pointers and illuminators; Weapon sights and night vision systems; Surveillance system; Projects & OEMs

ADOS-TECH
Thermal and night vision devices

ATRI
Thermal imagers and surveillance systems, night driving system for the armoured vehicles

SONDERUS LT
Perimeter surveillance systems comprising of radars, imaging and AI

TONBO IMAGING
Electro-optics and IR imaging systems, OEM

VAIZDUOTĖ
Sensors for the identification and localization of vehicles

KRYPTINGI PROJEKTAI
Object recognition using AI and cameras

POLIMASTER EUROPE
Radiation detection and measurement, personal dosimeters, radionuclide identification devices

LITAK-TAK
Air defence systems: radar, SAM, ATC

NT SERVICE
Counter-drone systems, radio blocking system

TIGBIS
Decoding, distant information collection, drone detection

GROUND

ARVEKA
Host nation real life support

GROUND VEHICLES

AUTOKURTAS
Technical support and maintenance of armored vehicles

OSTARA
Design and development of hybrid buggies

PERSONAL EQUIPMENT

AUDIMAS
Tactical clothing

GARLITA
Specialised clothing, uniforms

TUMA
Battle dress, uniforms, jackets

OMNITEKSAS
Functional garments from jersey fabrics

SAFARILAND LITHUANIA
Armored vests

TAKTINIAI SPRENDIMAI
Pouches, holsters, cases for various equipment, tactical clothing systems

LIELBATA
Ballistic helmets

R&D

BPTI
Defence and security-related R&D in RF, AI and AR/VR for military UX/UI solutions

FTMC
Development of special equipment: laser, electromagnetic measurement; military clothing and protection
